

Adaptive Tools

Ergonomic Handles

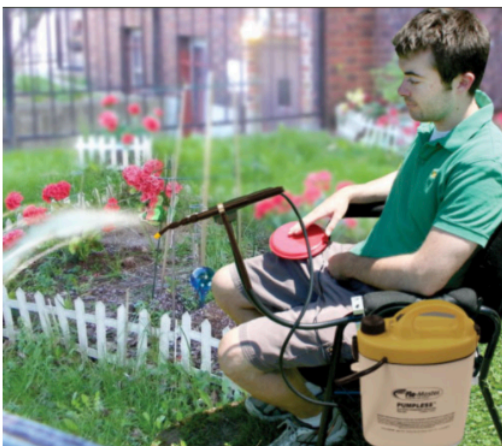

By keeping the hand and wrist at a natural angle, tools with ergonomic handles and arm rests eliminate the strains and blisters that can be caused by conventional style garden tools.

Watering Wand

A watering wand extends the end of the hose to assist gardeners with watering hard to reach areas. If moving around a hose is troublesome, you may want to consider a garden sprayer.

Garden Sprayer

The Adapted Garden Spray from Enabling Devices includes a sprayer that can attach to a wheelchair and has a 1.3 gallon tank for holding water. It is also switch accessible for those who cannot access a sprayer handle. In the image the man is using a red button switch to start and stop the sprayer.

Garden Kneeler Chair

Foldable Design

Save your space Easy to store and carry

Portable Seats

A lightweight and portable seat like the one pictured can assist individuals with sitting, kneeling, and getting up or down easily.
